

PADO

The Decentralized Universal Exchange

Engine for Asia Built on Blockchain

www.pado.io

The Market Opportunity

- 16M+ crypto users in South Korea (30% of population)
- DeFi market growing at 46%+ CAGR through 2032
- Crypto holders now exceed stock traders in Korea
- Users demand all-in-one platforms, not fragmented dapps

The Problem: Fragmentation

- DeFi is broken into silos—DEXs, perpetuals, lending, staking
- Users bridge liquidity across chains & manage multiple wallets
- No unified margin, no portfolio-level risk management
- Centralized exchanges dominate but lack transparency & ownership
- Asia lacks a trusted, decentralized alternative to Coinbase/Robinhood

Coinbase's 2026 Strategy

Building "Everything Exchange" with unified platform across:

- Spot & perpetual trading (crypto, stocks, metals)
- Prediction markets, direct deposit, lending up to 5M in loans
- AI advisor, tokenized assets, global payments

Pado: The Decentralized Alternative

Coinbase Model

Centralized custody, regulated intermediary, proprietary rails

Pado Model

Non-custodial, on-chain verifiable, user-owned accounts

Complete Financial Stack

- **Spot + Derivatives Trading** – Crypto, equities, prediction markets
- **Unified Margin** – Cross-product collateral, real-time settlement
- **Lending & Staking** – Earn yield directly in-account
- **Payments** – Near-zero fee transfers, instant confirmation

Put a large horizontal image of the tabs showing different products
Spot, predictions, perp, lending, etc.

Built for Scale & Security

- **Nasun Blockchain** – High-speed parallel execution, sub-second confirmation
- **zkLogin + Passkeys** – Seedless authentication, no private key exposure
- **Object-Based Architecture** – Atomic, composable financial transactions
- **Trust-Minimized Vaults** – MPC custody for cross-chain assets

Break this up into four boxes and put a wave pattern in bkgd

Designed for Asia, Built for South Korea

Why Korea is the beachhead:

- 30% population with crypto accounts, strongest adoption globally
- Advanced mobile infrastructure & payment expertise
- Hunger for alternatives to centralized exchanges (trust deficit)
- Regulatory clarity emerging in 2026

Maybe a chart of one of these things growing/going up

Unified Capital = Better Returns

Traditional model: Users manage capital in silos.

Pado: One account. One margin pool. Every asset works harder.

- Earn yield on idle collateral while trading perpetuals
- Hedge spot positions atomically with futures
- Transparent, real-time portfolio risk

Pado vs. The Incumbents

A background image of Super Saiyan Vegeta from the anime Dragon Ball Z. He is shown from the waist up, with his signature spiky blonde hair and intense orange aura. He wears his black and orange Saiyan armor and a blue sash. His expression is serious and determined.

CEX (Coinbase/Upbit)

Convenient, but custody risk & opaque risk management

Fragmented DeFi

Non-custodial, but requires bridge hops & multiple accounts

Pado

Decentralized, unified, seamless

Sustainable Revenue Streams

- Trading fees (spot, perpetuals, prediction markets)
- Lending protocol interest & yield spread
- Cross-chain vault integration fees & premium services
- Staking rewards & tokenized asset issuance
- Developer API access for wallets & fintechs

Phase 1: Korea Launch (2026)

- Core product: Unified spot + perpetuals on Nasun
- Target: Early traders seeking non-custodial control
- Partnerships: Local payment rails, community incentives
- Marketing: Compare directly to Upbit/Coinbase on UX & safety

Phase 2-3: Asia Expansion & Cross-Chain

- Add lending, prediction markets, tokenized equities
- Expand to Japan, Singapore, emerging Asia markets
- Integration of cross-chain vaults (BTC, ETH native access)
- Institutional onboarding via Pado Business suite

Why Pado Wins

User Control

Own your assets, not a promise

Capital Efficiency

Unified margin = better returns

Durability

No platform risk, no regulatory ban

Join the Decentralized Finance Revolution

Pado: The Everything Exchange Users Own

Built on Nasun. Made for Asia. For Everyone.
